

Update on Fiber-to-the-Home

In the summer of 2013, we started outside construction on the first phase of Fiber-to-the-Home communication services. Now in 2018, we are going to be starting outside construction on the fourth and final phase with conversions beginning in 2019.

Fiber-to-the-Home is the delivery of a communications signal over optical fiber from SMU's switching equipment all the way to the service address.

At the July Board of Trustees meeting, a contractor was selected and outside construction is set to begin yet this year. If you are located in the final phase of construction, watch for more information on when we will need your assistance with setting up service. As with the other phases, there are several stages throughout the construction process.

We are looking forward to completing this multi-year project to better serve the community of Spencer!

The Federal Communications Commission (FCC) has rules requiring telecommunications service providers like Spencer Municipal Utilities to make its services and products accessible to people with disabilities, if such access is readily achievable. These rules implement Section 255 of the Federal Communications Act. Section 255 requires telecommunications service providers to make their services and specialized customer premises equipment that are commonly used by people with disabilities, if such compatibility is readily achievable. Please contact us at 580.5800 for further information or to discuss your accessibility needs and the options we may have to assist you in using our services.
